

Name: Rebecca (Becky) Wagner, BA

Title: Division of Education Program Coordinator, Marshfield Clinic Health System (MCHS)

Professional Responsibilities: I have had the pleasure of working for Marshfield Clinic Health System for the past 10 years. During my career, I have served in various administrative and staff leadership roles. In 2015, I decided it was time to pursue my education further so I, along with my husband, made the commitment to go back to college together. I graduated in 2018 from Lakeland University with a Bachelor of Business Administration/Healthcare Management. Upon receiving my degree, I immediately searched for a job which would highlight my skills and newly obtained degree. I started working in the Division of Education at Marshfield Clinic Health System as a Program Coordinator. In this role, I wear many hats (which I love), and have the opportunity to work with Providers and Advanced Practice Clinician's (NP's/PA's) to coordinate their clinical orientation program, ensuring they have a positive and meaningful experience as they start in their new role within a large organization. I enjoy working with all levels of leadership at MCHS and thrive the most when my plate is full.

Professional Interests: I am a computer geek at heart and love the challenge of learning new technologies. I have a strong desire to apply new technologies to enhance and improve processes. I have had very little creative design training, but I have a proven track record at designing professional and well-polished business materials (flyers, brochures, and websites, etc.). I have also been known to help coordinate a good WISHET conference (or three). 😊

Accomplishments:

- Coordinated and nurtured the growth of the Entry to Practice Program (for newly licensed Advanced Practice Clinician's), offering the program to all primary care and specialty areas at MCHS.
- Participated in a workgroup to develop a standardized department specific orientation and annual competency onboarding process, including the design of forms, for all levels of staff at MCHS.
- Streamlined the use of paper forms/PDF's with the development of fillable online forms through InfoPath.
- Developed and created many internal and external facing websites promoting clinical and community education.

Fun information about me: My husband (Jason) and I have two beautiful cats, Izzy (9) and Caprice (8). They are the highlights of our lives and I look forward to them greeting me every day when I get home from work. Jason and I like to go for walks, try new places to eat and sometimes do an occasional pull (or two) on a slot machine.
