

Name: Kaela Churchill

Title: Program Coordinator

Organization: Marshfield Clinic Health System – Division of Education

Professional Interests: Internal Customer Experience, Process Flow/Improvement, Graphic Design/Data Visualization

Professional Info: I work in the Division of Education as a Program Coordinator, where I support two programs for our System’s physicians and APCs. The first program is the Physician & APC Mentoring Program, which pairs onboarding providers with established colleagues for two years from start of employment. This program does not have a clinical focus, but instead, helps provide support, connection, resources, and a professional model to onboarding providers. The second program is the APC Chart Review Program, which helps Supervising Physicians evaluate clinical competency of APC’s system-wide. The APC Chart Review Program is undergoing an exciting revamp: we are busy converting its current paper format to an electronic process and look forward to roll-out soon!

Fun Info: Outside of work, I enjoy spending time “Up North” with my husband, Tom and son, Camden. Love interior design, baking/cooking, and celebrating holidays.
