

Name: Dione M. Thoma, RN

Title: Education Coordinator at St. Croix Health (SCH)

Professional Responsibilities: My role as Education Coordinator provides me with opportunities to collaborate with all hospital and clinic departments to assure onboarding education is aligned, training is created and/or assigned, and compliance is met. Other duties within my position include administrator of our learning management system, onboard and oversee student clinical experiences, participate in all things related to compliance education for the organization, as well as participate in committees and meetings as an education subject matter expert. With SCH's recent rebranding and as growth continues, I am excited to support our hospital and clinic system's commitment in becoming a learning organization.

Professional Interests: I appreciate the challenge in making training tasks both educational and fun; introducing new learning opportunities through design, simulated scenarios, or technology provides for opportunities to reach all learners. I enjoy collaborating with peers in discovering process-improvement approaches to provide for improved staff and patient experiences.

Random Information About Me: I find joy in gardening, baking, and creating (crafting, building, or repurposing), but time with family and friends is what truly grounds me. I enjoy the beauty of nature, so I am often at the lake/cabin, in my garden, or just creating new trails.
