

Kaela Churchill

Professional Biography

I am a Program Coordinator in the Division of Education at Marshfield Clinic Health System (MCHS). In my role, I provide oversight to the APC Chart Review Program, which helps the System adhere to regulations and assess competency of APCs system-wide. This program is currently undergoing an exciting transition to a virtual format after many years as a paper-based process. Additionally, I oversee the Physician and APC Mentoring Program, which pairs onboarding providers with mentors to help provide professional, social, and community guidance and support. Finally, I partner with the CME Team to offer Cattails College, a networking and educational event for new physicians and APCs, designed to welcome them to MCHS.

My professional interests lie in providing excellent customer experiences, program development and continuous improvement, and designing effective, visually appealing program and instructional materials.

Outside of work, I enjoy spending time with my husband, Tom, and son, Camden. We love living “Up North” and taking advantage of the amazing sights and lakes the area offers. I also enjoy interior design, baking/cooking, and celebrating holidays.
